

A tool for almost all squares on valves. Uni-Key-Adapter 4 pipes.

Extremely practical

Missing, broken or rusted squares, or those with exceptional dimensions are no longer a problem in case of emergency

Many different fittings key / adapter in service tools are no longer required

The Innovation

Hardened special steel pins attach themselves to all contours and grip them securely

Uni-Key-Adapter in 2 versions

Fits all contours and can be operated with the standard hydrant key

Thick-walled body, coated steel, guaranteed function even at high torsional forces

2 sizes are available:

The Standard-size with 80 mm \varnothing – Standard fittings KOS and hydrants

The Mini-size with 60 mm \varnothing – For small streetcaps VAS, fitting the standard 27x32 mm head as well!
